

COAD General Membership

Date: January 14, 2026

Time: 1:30-3:00 p.m.

Location: Hybrid-Webex

Heart to Heart International

11550 Renner Blvd.

Lenexa, KS 66219

The KCR COAD's General Membership Meeting in January will focus on Next Generation 911. For more information on this critical topic, please see: <https://www.missouri911.org/ng911> and <https://ng911.kansasgis.org/>. Often referred to as NG911, the system creates a faster and more resilient network that improves public safety. This is accomplished through improved interoperability, enhanced location determinations, multimedia capabilities, increased reliability, dynamic re-routing, and efficient emergency response networks all under a cybersecure framework. A general overview of NG911 will be presented by state and local experts, along with a specific regional focus with further emphasis on disaster response and recovery. There will be additional discussion on NG911 as it pertains to ongoing FIFA World Cup planning efforts.

After the presentations, COAD committee updates will be given, general updates made, and time available for any partner announcements or discussion.
